The International Union of Pure and Applied Chemistry (IUPAC), formed in 1919, is a voluntary non-governmental, non-profit association of organizations, each of which represents the chemists of a member country. Its objectives are as follows:

• to promote continuing cooperation among the chemists of the member countries
• to study topics of international importance to pure and applied chemistry which need standardization or codification
• to cooperate with other international organizations that deal with topics of a chemical nature
• to contribute to the advancement and understanding of pure and applied chemistry in all its aspects

The membership of IUPAC currently comprises 45 national organizations.
